3.

將 output 寫到一個 csv 檔裡比較方便將資料匯入 excel

```
3.py X
3.py > ...
1 import random
2 w2=2.0
3 w1=0.5
4 w0=0.3
5 num_sample=30
6
7 with open('random points.csv','w') as fh:
8     fh.write("x,r\n")
9     for i in range(0,num_sample):
10         x=random.uniform(0,1)
11         r=w2*x**2 + w1*x + w0 + random.gauss(0,0.1)
12         print('x =', round(x,3), ', r =', round(r,3))
13         fh.write(f"{round(x,3)},{round(r,3)}\n")
```

PS D:\Profile\Daniel\OneDrive\桌面\大三下\機器學習導論\HW1> python -u "d:\Profile\Daniel\OneDrive\桌面\大三下\機器學習導論\HW1\3.py"

```
